FORM 8-K

CURRENT REPORT
Pursuant to Section 13 OR 15(d) of the Securities Exchange Act of 1934

Date of Report (Date of earliest event reported): **November 7, 2025**

Camber Energy, Inc.

(Exact name of registrant as specified in its charter)

Nevada	**001-32508**	**20-2660243**
(State or other jurisdiction of incorporation)	(Commission File Number)	(I.R.S. Employer Identification No.)

12 Greenway Plaza, Suite 1100, Houston, Texas	**77046**
(Address of principal executive offices)	(Zip Code)

(Registrant's telephone number, including area code): (281) 404-4387

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

? Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
? Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
? Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
? Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities registered pursuant to Section 12(b) of the Act: None.

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter). ?

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ?

Item 7.01. Regulation FD Disclosure.

On November 10, 2025, Camber Energy, Inc. ("Camber") issued a press release regarding the events described in Item 8.01 of this Current Report on Form 8-K. A copy of the press release is furnished as Exhibit 99.1 hereto.

The information in this Item 7.01, including Exhibit 99.1, is being furnished and shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, nor shall it be incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as expressly set forth by specific reference in such filing.

Item 8.01. Other Events.

On November 10, 2025, Camber announced, through its indirect majority-owned subsidiary, Viking Ozone Technology, LLC ("VOT"), that its flagship *VKIN-300* medical and bio-hazardous waste pre-treatment unit (the "VKIN-300 Unit") passed the acceptance review by Laboratoire national de métrologie et d'essais ("LNE") to obtain official certification of compliance with French Standard NFX 30-503, regarded as one of the world's strictest standards for waste decontamination equipment.

In connection with the proposed certification process, Camber previously announced that VOT had shipped the VKIN-300 Unit to France in January 2025 and received a report in July 2025 from Laboratoire Hygiène Hospitalière CHU Clermont-Fd ("LHH"), an independent lab, concluding that tests carried out in accordance with French Standard NFX 30-503 demonstrated that the VKIN-300 Unit met the specifications of the standard.

On or about October 17, 2025, VOT received a report (the "Evaluation Report") from LNE, summarizing the testing procedures carried out in accordance with French Standard NFX 30-503 and associated results, and concluding as follows:

- French Version: "*Au vu du dossier de demande d'attestation de conformité évalué, le produit référencé en première page de ce rapport et décrit dans ce dossier de demande est conforme aux spécifications des textes applicables.*"

- English Translation (translated through DeepL Pro Ultimate): "*In view of the conformity assessment application file evaluated, the product referenced on the first page of this report and described in this application file complies with the specifications of the applicable texts.*"

The foregoing description of the Evaluation Report does not purport to be complete and is qualified in its entirety by reference to the full text of the Evaluation Report, the French version of which is attached hereto as Exhibit 99.2 and is incorporated herein by reference, and the English translated version of which is attached hereto as Exhibit 99.3 and is incorporated herein by reference.

On November, 7, 2025, the LNE confirmed that VOT's application for a certificate of conformity for the VKIN 300 pretreatment unit is complete, satisfactory, and compliant with the requirements of standard NF X 20-703-1 of April 2024, and that formal attestation of conformity under the French decree Arrêté du 20 avril 2017 (Ministry of Social Affairs & Health, relating to pretreatment by disinfection of regulated medical care waste – DASRI) is expected to be issued once the decree is updated to reference French Standard NFX 30-503 and LNE's own certification framework is amended accordingly. Given the conclusion of the Evaluation Report it is likely the certification will be obtained but there are no assurances of such result.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits.

Exhibit No.	Description
99.1	Press release dated November 10, 2025.
99.2	Evaluation Report, the French version, dated October 17, 2025.
99.3	Evaluation Report, the English translated version, dated October 17, 2025.
104	Cover Page Interactive Data File (embedded within the Inline XBRL document).

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

Camber Energy Subsidiary Achieves Major Regulatory Milestone for VKIN-300 Waste-Treatment System in France

French national certification body verifies compliance; final attestation to follow upon standard update — opens path for Europe commercial roll-out

HOUSTON, TX / ACCESSWIRE / November 10, 2025 – Camber Energy, Inc. (OTCQB: CEIN) (“Camber”, “CEIN”, or the “Company”), through its majority-owned subsidiary Viking Ozone Technology, LLC (“Viking Ozone”), today announced that its flagship VKIN-300 medical and bio-hazardous waste pretreatment system has passed the acceptance review by Laboratoire national de métrologie et d’essais (“LNE”) under French standard NFX 30-503-1 (April 2024) — a key step toward full French attestation and commercial deployment across France and Europe.

The dossier submitted by Viking Ozone was confirmed by LNE on November 7, 2025 to be complete, satisfying and compliant with the requirements of NFX 30-503-1. The formal attestation of conformity under the French decree Arrêté du 20 avril 2017 (Ministry of Social Affairs & Health, relating to pretreatment by disinfection of regulated medical care waste – *DASRI*) is expected to be issued once the decree is updated to reference NFX 30-503-1 (April 2024) and LNE’s own certification framework is amended accordingly.

This regulatory credential significantly enhances the value proposition of CEIN’s infrastructure technology platform and strengthens its position in the multi-billion-dollar global institutional waste-management sector.

“*This milestone marks a transformational moment for CEIN’s waste-treatment platform,*” said James Doris, President & Chief Executive Officer of Camber. “*Having our VKIN-300 system recognized as compliant by France’s leading certification authority demonstrates our technology’s competitive edge, regulatory readiness and scalability. We are now better strategically positioned to accelerate our European market penetration and drive value for our shareholders.*”

About the VKIN-300 System

The VKIN-300 is the flagship modular system from Viking Ozone, offering ozone-based disinfection and shredding of regulated medical and bio-hazardous waste. With certified compliance in France pending, CEIN is poised to address the multi-billion-dollar global institutional waste-management sector by providing hospitals, laboratories and large facilities with a lower-emissions, lower-volume alternative to traditional methods. This regulatory validation enhances CEIN’s go-to-market strategy and underpins future license-and-distribution agreements globally.

About Viking Ozone Technology, LLC

Viking Ozone Technology, LLC (a majority-owned subsidiary of Camber Energy, Inc.) develops, manufactures and markets advanced ozone-based waste-treatment platforms for regulated medical and bio-hazardous waste. The Company holds patented technology and a global distribution strategy targeting hospitals, laboratories, correctional facilities and large institutional customers. CEIN’s backing provides scale, financial disclosure and a diversified infrastructure portfolio.

About Camber Energy, Inc.

Camber Energy, Inc. is a growth-oriented diversified technology company focused on critical infrastructure solutions, energy technology and environmental systems. Through its subsidiaries, Camber provides custom energy and power solutions to commercial and industrial clients in North America and has a majority interest in: (i) an entity with intellectual property rights to a patented, proprietary medical and bio-hazard waste treatment system using ozone technology; and (ii) entities with the intellectual property rights to patented and patent pending, proprietary electric transmission and distribution broken conductor protection systems. Camber also holds, through a subsidiary, an exclusive license in Canada to a patented clean energy and carbon-capture system. For more information, please visit the Company's website at www.camber.energy.

Forward-Looking Statements

This press release may contain forward-looking information within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended. Any statements that are not historical facts contained in this press release are “forward-looking statements”, which statements may be identified by words such as “expects,” “plans,” “projects,” “will,” “may,” “anticipates,” “believes,” “should,” “intends,” “estimates,” and other words of similar meaning. Such forward-looking statements are based on current expectations, involve known and unknown risks, a reliance on third parties for information, transactions that may be cancelled, and other factors that may cause our actual results, performance or achievements, or developments in our industry, to differ materially from the anticipated results, performance or achievements expressed or implied by such forward-looking statements. Factors that could cause actual results to differ materially from anticipated results include risks and uncertainties related to the fluctuation of global economic conditions or economic conditions with respect to the oil and gas industry, the COVID-19 pandemic, the performance of management, actions of government regulators, vendors, and suppliers, our cash flows and ability to obtain financing, competition, general economic conditions and other factors that are detailed in Camber's filings with the Securities and Exchange Commission. We intend that all forward-looking statements be subject to the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995.

Camber cautions that the foregoing list of important factors is not complete, any forward-looking statement speaks only as of the date on which such statement is made, and Camber does not undertake to update any forward-looking statements that it may make, whether as a result of new information, future events or otherwise, except as required by applicable law. All subsequent written and oral forward-looking statements attributable to Camber or any person acting its behalf are expressly qualified in their entirety by the cautionary statements referenced above.
